ARÉ MARBLE

# Hurricane

Hurricane Aré Marble is a peculiar white marble, with an outstanding personality. Its coloration is predominantly white, with some gray veins, which give the stone a special charm. Its minimalist presentation promotes an elegant look, proving that luxury and subtlety go together. Besides its unique beauty, its composition of minerals composes a hard material, with high resistance, low porosity, and low water absorption.

**Hurricane** is the ideal name to represent this marble, which besides beautiful and rare, has the grandeur of a natural phenomenon.

- **COLORS**

White and gray.

- **COMPOSITION**

Dolomite, quartz and calcite.

- **ORIGIN**

Aré Quarry, Rio de Janeiro.
